**Exam : 71301X**

**Title : Avaya Aura Communication  
Applications Implement  
Certified Exam**

**Version : DEMO**

- 1.Which statement about the SIP Entities to support single node Avaya Aura® Presence Services is true?
- A. Only one SIP Entity is built of Type = “Presence Services”, which uses the SM100 IP address of the Avaya Breeze™ node.
  - B. Only one SIP Entity is built of Type = “Avaya Breeze”, which uses the SM100 IP address of the Avaya Breeze™ node.
  - C. Two SIP Entities are built to the same SM100 IP address of each node. One is of type = “Avaya Breeze”, and the other is of Type = “Presence Services”.
  - D. Two SIP Entities are built to the same SM100 IP address of each node. One is of type = “Avaya Breeze”, and the other is of Type = “Other”.

**Answer: B**

- 2.Which three steps are necessary to make a successful Implementation of Avaya Breeze™ WebRTC Snap-in? (Choose three.)

- A. Load the Snap-in.
- B. Download and Install WebRTC License file.
- C. Busy and Release the WebRTC snap-in.
- D. Manually configure the WebLM IP address in the WebRTC configuration attributes.
- E. Install the Snap-in.

**Answer: A,B,E**

**Explanation:**

Step 1: Download and install the license file

Procedure

0. Download the snap-in license file from PLDS.

1. On System Manager navigate to Home > Services > Licenses.

2. Select Install License.

3. Browse to the location of the snap-in license.

4. Select the license file and click Open.

5. Click Accept the License Terms & Conditions and click Install. The system installs the license file.

In the left navigation pane, the system displays the snap-in under Licensed Products. Step 2: Load the snap-in

Step 3: Install the snap-in

- 3.After running the Install wizard on Avaya Session Border Controller for Enterprise (SBCE), you added a Public Outside IP address to the B1 interface. You try to ping this IP address from a PC in the same subnet but it fails.

What would you do first to resolve the issue?

- A. Restart Applications.
- B. Set the Default Gateway router IP address, navigate to the Interfaces and Enable the B1 Interface.
- C. Reboot SBCE.
- D. Navigate to Device Specific Settings > Network Management > Interfaces and Enable the B1 interface.

**Answer: D**

**Explanation:**

The interface might need to be enabled.

4. A field engineer runs the Installation Wizard to install the Avaya Session Border Controller for Enterprise (SBCE).

Which statement about the Domain Name Service (DNS) configuration is true?

- A. A DNS address always needs to be configured for both the Primary and Secondary DNS, even if only the DNS is available.
- B. A DNS address does not need to be configured.
- C. A DNS address needs to be configured, even if it is unused and/or unreachable.
- D. A DNS address should not be configured here.

**Answer: C**

**Explanation:**

The system requires the DNS server to resolve the host names for alarming and remote access name associated with the Avaya Service Center. You must supply a DNS address entry, even if it is unused

and/or unreachable.

5. When planning the Avaya Session Border Controller for Enterprise (SBCE) for SIP Trunking, what is a good practice to adopt?

- A. Name Interfaces consistently, for example, A1 for Internal network to Call Server and B1 for external to Trunk Server.
- B. Name all internal and external interfaces exactly the same.
- C. Use the same IP address on both, internal and external sides of the network.
- D. Use one Avaya Session Border Controller for Enterprise on the internal and external sides of the network.

**Answer: A**

**Explanation:**

Use the same interface mapping throughout! Examples in this section use:
