Exam : Data Architect

Title : Salesforce Certified Data Architect

Version : DEMO

1.Universal Containers (UC) has a very large and complex Salesforce org with hundreds of validation rules and triggers. The triggers are responsible for system updates and data manipulation as records are created or updated by users. A majority of the automation tool within UC" org were not designed to run during a data load. UC is importing 100,000 records into Salesforce across several objects over the weekend.

What should a data architect do to mitigate any unwanted results during the import?

- A. Ensure validation rules, triggers and other automation tools are disabled.
- B. Ensure duplication and matching rules are defined.
- C. Import the data in smaller batches over a 24-hour period.
- D. Bulkify the trigger to handle import loads.

Answer: A

2.UC is migrating data from legacy system to SF.

UC would like to preserve the following information on records being migrated:

- ☞ Date time stamps for created date and last modified date.
- ☞ Ownership of records belonging to inactive users being migrated to Salesforce.

Which 2 solutions should a data architect recommend to preserve the date timestamps and ownership on records? Choose 2 answers.

- A. Log a case with SF to update these fields
- B. Enable update records with Inactive Owners Permission
- C. Enable Set Audit fields upon Record Creation Permission
- D. Enable modify all and view all permission.

Answer: A,C

3.A company wants to document the data architecture of a Salesforce organization.

What are two valid metadata types that should be included? (Choose two.)

- A. RecordType
- B. Document
- C. CustomField
- D. SecuritySettings

Answer: A,C

4.Universal Containers (UC) has implemented Sales Cloud for its entire sales organization, UC has built a custom object called projects_c that stores customers project detail and employee billable hours.

The following requirements are needed:

A subset of individuals from the finance team will need to access to the projects object for reporting and adjusting employee utilization.

The finance users will not access to any sales objects, but they will need to interact with the custom object.

Which license type a data architect recommend for the finance team that best meets the requirements?

- A. Service Cloud
- B. Sales Cloud
- C. Light Platform Start
- D. Lightning platform plus

Answer: D

5. Universal Containers has received complaints that customers are being called by multiple Sales Reps where the second Sales Rep that calls is unaware of the previous call by their coworker.

What is a data quality problem that could cause this?

- A. Missing phone number on the Contact record.
- B. Customer phone number has changed on the Contact record.
- C. Duplicate Contact records exist in the system.
- D. Duplicate Activity records on a Contact.

Answer: C
