Exam : **PRINCE2Practitioner**

Title : **PRINCE2 Practitioner Exam**

Version : **DEMO**

1. Testlet 1

Project Scenario – Health and Safety Training Project:

ABC Company is a well-established training company that uses a standard model to develop training materials and deliver courses to customers.

ABC Company has commissioned a project in response to recent changes in government legislation relating to health and safety on construction sites. The project will deliver “capability to provide health and safety training”, including the materials needed for classroom-based training and e-learning. The expected benefits for construction companies include a reduction in lost days and legal costs due to accidents.

The e-learning course will be developed by a specialist external consultancy. The materials for classroom-based training will be delivered by ABC Company’s development team. All course materials will be piloted before they are used. ABC Company will deliver training to its customers and also hopes to sell the course materials to other training companies as part of their operational business. ABC Company will use their own sales and marketing departments to promote the courses.

The legislation requires construction companies to comply with the new legislation within two years. The course materials and trainers have to be accredited by a government agency before courses can be delivered. ABC Company is planning to deliver pilot courses within five months of starting the project.

The ABC Company standard development model for new courses recommends the following stages:

Stage 1	Initiation stage
Stage 2	Classroom-based training materials Marketing materials Training venue specifications Accredited classroom-based course
Stage 3	E-learning course Amended course booking procedures Marketed courses Planned pilot courses Updated corporate quality procedures Accredited e-learning course Accredited trainers
Stage 4	Delivered pilot courses Finalized materials Project product: Capability to provide health and safety training

End of the Project scenario.

Additional Information:

The Chief Executive Officer (CEO) founded the company five years ago. Under her leadership, ABC

Company has grown quickly into a successful training company. It delivers a range of accredited professional training.

The Finance Director is also a founder member of ABC Company and is responsible for authorizing budgets for the Operations and Development Teams. She authorizes all large contracts personally.

The Purchasing Manager reports to the Finance Director and is responsible for managing and monitoring supplier contracts.

The Operations Director is responsible for the delivery of all training and for the training development budget. His department organizes courses, venues and trainers. They work with the Product and the Sales teams to provide a comprehensive training schedule. ABC Company's IT manager reports to the Operations Director.

The Business Development Director has recently been appointed to identify new training needs and propose new products. She will work with the Operations Director to ensure a cost-conscious approach and that appropriate development technologies are used for the health and safety course.

The Training Development Manager reports to the Business Development Director and is responsible for developing training materials and gaining accreditation, in accordance with the standard course development model. Course developers in his team have skills in a range of development technologies and are allocated to projects as needed.

The Training Delivery Manager, who reports to the Operations Director, is responsible for ensuring that internal and external trainers deliver ABC Company training courses to the required standard. He also checks course materials to ensure they are fit for purpose and of the required quality.

The Central Services Director has responsibility for corporate communications, facilities management and configuration management. He recently led a project to consolidate all company quality systems into one quality management system and set up a corporate quality department, now managed by the Corporate Quality Manager.

The Corporate Document Manager reports to the Central Services Director. She helped establish the company's document management system and now operates it across the business. She manages a team of administrators and contracts staff when workload is high.

The Sales Director joined ABC Company two months ago and is keen to establish himself by suggesting new markets for the courses and material. All account managers and the marketing team report to him. They promote existing training courses to other training companies and existing customers.
End of the additional information.

Based on lessons from previous projects that used the ABC Company standard development model, the project board has set low cost and time tolerances for stage 2. As a result, the project manager plans to set very low tolerances for time and cost for all work packages to be carried out during stage 2. Is this an

appropriate application of the 'manage by exception' principle, and why?

- A. Yes, because the project manager should set tolerance equally for all work packages in a stage.
- B. Yes, because setting appropriate tolerances for work packages will help keep the stage within tolerances.
- C. No, because tolerances set by the project manager should be the same as those set by the project board.
- D. No, because the project manager should divide the stage tolerances between the team managers.

Answer: B

2. During stage 4, a work package was authorized for the 'delivered pilot courses' to be completed by the end of week 2. The 'finalized materials' work package will start in week 3. Both work packages have zero tolerances, and finalizing the materials is dependent on feedback from the pilot courses.

During week 1, there were some problems with the pilot courses, so at the start of week 2 the team manager rescheduled the courses to week 3, and reported this in the weekly checkpoint report as the end of week 2.

Should the team manager have reported this delay previously as an issue, and why?

- A. Yes, because the work package to deliver the pilot courses was forecast to exceed its time tolerance.
- B. Yes, because a team manager should not change the scheduled order of a work package.
- C. No, because the checkpoint report for week 1 should include information on any issues that occurred.
- D. No, because the feedback from the rescheduled courses can be used in week 4 to finalize the materials.

Answer: A

3. The project is now closed. The expected increase in revenue is not being achieved. It has been agreed with the team manager for the 'marketing materials' that additional marketing activities will be undertaken to achieve the expected increase in revenue.

Who should be responsible for monitoring the results of the marketing activities, and why?

- A. Senior user, because this person is responsible for realizing the benefits post-project.
- B. Senior user, because this person is responsible for specifying the desired from the project.
- C. The team manager for the 'marketing materials', because this person has the skills to demonstrate that the activities are effective.
- D. The team manager for the 'marketing materials', because the project board is disbanded at the end of the project.

Answer: A

4. MANAGING A STAGE BOUNDARY

The ABC Company trainers have been accredited and the course booking procedures have been amended. The 'managing a stage boundary' process is taking place at the end of stage 3.

Which activity should occur during the 'update the business case' activity?

- A. Update the overall plan with the time and cost taken to develop the 'e-learning course' and 'amended course booking procedures'
- B. Break the 'planned pilot courses' down into component products in order to identify the work required to deliver them.
- C. Review whether the possible sales of the training course to external companies are likely to cover the

project costs.

D. Review whether a new team manager should be appointed to lead the delivery of the pilot courses during stage 4.

Answer: A

5. Towards the end of stage 2, the stage 3 plan is being prepared. This includes the work required to promote the new courses to other training companies. In addition to the current ways of marketing the courses, the Sales Director wants to advertise in trade magazines. The likely costs involved and the opportunities it may bring have been identified.

As part of the 'update the project plan' activity, what should the project manager be responsible for?

A. Creating time and cost tolerances for the delivery of the magazine advertisements.

B. Creating the product description, with detailed quality criteria, for the magazine advertisements.

C. Recording the effect of implementing the magazine advertisements on the overall time and cost of the project.

D. Recording changes to ABC Company risk appetite as a result of using the magazine advertisements.

Answer: C
