**Exam** : **ROM2**

**Title** : Blue Prism ROM 2 Professional (Robotic Operating Model 2)

**Version** : DEMO

1.Which activity helps evaluate whether operational service commitments are being achieved?
A. Service review
B. Disaster recovery testing
C. Digital worker onboarding
D. Development methodology review
**Answer:** A

2.A global life sciences company has moved to quarterly automation releases involving several delivery teams. Reviews show that implementation risks were typically identified only during final deployment preparation, leaving too little time to plan mitigation.
The automation governance board wants delivery teams to identify and evaluate implementation risks much earlier, so corrective action can be planned before release activity begins.
Which practice should become part of the delivery lifecycle?
A. Risk assessment performed early in each delivery cycle
B. A contingency budget held centrally to fund late corrective work
C. An escalation path taking deployment issues to the governance board
D. A go or no-go decision meeting immediately before each release
**Answer:** A

3.An organization has run its automation program from a single central team for two years. Three business units now have enough demand to justify their own delivery capacity, and each has asked to build one.
What should the Center of Excellence decide first?
A. Whether each unit can fund a delivery team, a manager and a training budget of its own for the next two financial years.
B. Which responsibilities stay central and which move out, before any unit starts recruiting.
C. How many Digital Workers each unit will be allocated once its team is delivering.
D. Which of the three units has the most automation experience, so it can lead the others.
**Answer:** B

4.Which assessment primarily evaluates how difficult a business process will be to automate?
A. Complexity assessment
B. Benefit assessment
C. Volume analysis
D. Stakeholder mapping
**Answer:** A

5.A global manufacturing organization has experienced rapid growth in its automation program over the past eighteen months. While project delivery continues to meet expectations, the CoE notices that many experienced developers rarely participate in supporting colleagues outside their immediate project teams.
Leadership wants to create an environment where employees actively contribute reusable knowledge, coach peers, and promote continuous professional growth without introducing additional management responsibilities.

Which initiative would best support this objective?

A. Peer coaching

B. Certification targets and delivery scorecards

C. Job rotation

D. Recruitment drive

**Answer:** A
